

COCHMM

October Membership Meeting  
Friday, October 25, 2013  
7:30 – 9:00 am

**OSHA's New Hazard Communications Standard** - With the multitude of chemicals in production today and the many varied hazards associated with them, the need for a way to communicate those hazards globally became apparent.

The GHS is an acronym for The Globally Harmonized System of Classification and Labelling of Chemicals. The GHS is a system for standardizing and harmonizing the classification and labelling of chemicals. OSHA's

OSHA recently made some changes to its Hazard Communications Standards (HCS) to bring the United States into alignment with the GHS. Bill Schneider, Principal Consultant with SRM & Associates, LLC will lead a discussion and answer some questions about how the changes to OSHA's HCS will impact your operations and provide some guidelines for implementing the new requirements.

Come join us.
